

Water Management Policy

Preamble

Although the college is situated in a prime urban location of Bhopal, where there is no water scarcity, the students are made aware of the water conservation policy of the college in the beginning of the course during the orientation programme. The students are to realize that every single drop of water is very precious and should be utilized with ultimate care and not to be wasted.

Statement

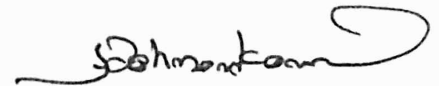

Christ College, Bhopal is committed to conserve water resources and practice rain water harvesting in order to replenish and recharge ground water resource.

Objectives

- To ensure clean and safe drinking water to the people present on the campus
- To ensure continuous supply of water throughout the year
- To replenish ground water through rainwater harvesting
- To minimize wastage of water in the campus

Action Plan

1. The institution will have a good storage capacity of water for cleaning and drinking purposes.
2. Rainwater harvesting pit will also be there for collecting rain water. Rainwater harvesting pit is monitored regularly and students are made aware about the concept of rainwater harvesting and its importance. The rainwater thus collected in the pit helps to replenish the ground water table.
3. Students will be given awareness on conservation of water throughout the year.
4. The college maintains leak proof water fixtures.
5. Immediate measures to deal with water leakage through taps, pipes, tanks, toilet flush etc.
6. Installing sensors in the taps in the washrooms for minimizing water wastage.
7. For waste water management the staff and students are advised to minimize water wastage by turning off taps when washing their hands and report any leaking taps. Every effort is taken by the staff and students to reduce wastage of water in mess, canteen and washrooms.
8. There is availability of proper functional drainage system in the college.
